We Capture Billing Errors, You Reap the Rewards

Many parcel and freight invoices contain billing errors. However, few companies have the bandwidth to accurately audit every invoice in the same manner as SSI.

As customer demand accelerates the need for speedy shipments, many supply chain leaders are looking for a fast, easy-to-implement solution to identify billing errors and reduce shipping costs. SSI offers an ideal contingency parcel and freight audit solution for these time-pressed leaders.

The savings add up fast. The recovered funds are sent to you directly or credited back to your carrier accounts. SSI receives payment via a nominal contingency fee based on the recoverable refunds. We only get paid when you get paid.

Guaranteed Savings with No Risk

SSI contingency audits are a win-win proposition. As a shipper, you have zero upfront costs, which may expedite decision making by your team, since there is no financial commitment to approve in advance of initiating the agreement.

Our automated audits identify freight-carrier billing errors, submit the claims to recover your refunds, and confirm refunds and credits upon receipt.

Automated Audits Using Advanced Technology

Automated auditing technology from SSI thoroughly scans your invoices electronically and automatically identifies erroneous billing mistakes. Our comprehensive service audits these items and much more:

- Freight charges
- Duplicate bills
- Dimensional rates
- Lift gate charges
- Residential surcharges
- Other accessorial charges
- Service failures
- Base rate errors
- Billing discrepancies
- Manifested vs. billed weights
- Fuel surcharges
- Carrier contractual compliance
