Get the SSI Advantage

Custom-fit software & services

Learn how SSI is different by design

C-level finance and operations leaders are increasingly turning to SSI for software solutions, expert support, and consulting services to identify and realize valuable savings from their complex, global supply chains.

Custom Freight Audit Solutions

Leaders across all industries are recognizing that manually performing freight-bill audits is a tedious, time-consuming drain of internal resources. A growing number of these leaders are turning to SSI, a time-proven provider of specialized freight audit and freight payment software solutions.

SSI customers receive an exacting, customized and automated audit process, supported by human intelligence. SSI audits 100% of your global freight carrier bills. Others spot-check invoices or use an imprecise one-size-fits-all audit process.

Our software verifies and authenticates accurate data and red flags duplicate charges and exceptions which deviate from client-carrier contracts and agreed-upon parameters. The process improves your profitability day-after-day, as SSI identifies substantial savings on your behalf.

Transparent Freight Payment Solutions

SSI also unshackles your team from the tedious work of coordinating global carrier payments. Our fast, secure process only pays for the actual allowable carrier charges and enables you to track every dollar spent.

Few providers match SSI's level of transparency, which ensures your funds are never co-mingled or used for any purpose other than paying freight invoices.

By intelligently outsourcing freight-audit and freight-payment processes to SSI, our customers enhance their productivity and maximize their profitability as they focus on what they do best.

Because we individually tailor our software and service solutions to dovetail with your specified business needs, the SSI approach truly is different by design. While results vary, some customers realize **up to a 20-to-1 return on investment.**

New improvements enhance agility and intelligence

SSIconnect 2.0 enhances the customer experience

SSI recently upgraded the performance and user interface of our SSIconnect proprietary software platform. Customer feedback has been overwhelmingly positive.

Users appreciate the speed with which they have visibility – from start to finish – of the freight audit and freight payment process. All contracts and rates are posted in the system with full transparency via our electronic Transportation Contract Assistant.

The platform provides easy access to a useful tool that efficiently filters and summarizes exceptions so resolutions are quick and cost-effective. Further, the carrier payment banking transactions tool (BTRANS) is updated daily to provide freight-payment assurance.

Powerhouse analytics sharpen insights

As part of SSIconnect 2.0, SSI has launched new data visualization tools and business intelligence (BI) resources. Modern, customizable dashboards empower transportation, logistics and finance professionals to identify freight-saving opportunities and gain transportation-efficiency insights. Equipped with relevant intelligence, our customers implement time-saving and cost-saving initiatives that provide a competitive edge.

Consulting services provide project expertise

SSI offers an array of professional consulting services to manage transportation shipping costs, reduce freight expenses, achieve supply chain savings, accelerate logistics efficiencies and improve distribution network design. To learn more about these consulting services, visit ssui.com or contact SSI.

Providing global supply chain logistics support, SSI audits invoices from more than 25,000 carriers worldwide and processes payments in the world's most traded currencies.

Gain a competitive edge

In summary, SSI specialized software and service solutions transform the complexity of freight audit and freight payment into cash savings and business intelligence which provides actionable insights to maximize your profit potential.

- Save time and money fast – Delivering value and identifying measurable cash savings for you.
- Thorough, customized freight auditing services – Modern, automated process dovetails with your needs for a one-of-a-kind solution supported by our in-house team of Audit Support Specialists.
- Fast, transparent processing – Auditing invoices within 3 business days and paying bills promptly. Custodial funds are never co-mingled, so you can track every dollar from the bank to the carrier.
- Cutting-edge business intelligence – Delivering powerhouse analytics and modern data visualization tools that provide you customizable dashboards relevant to your business.
- Professional services – Needing customized programming? Our in-house team of Custom Solutions Analysts are here to help.
- Customer-centered service – Ensuring customer needs are addressed is the top priority of your SSI Account Manager. You can also expect prompt attention from our Audit Support Specialists.
- Strategic investments in innovation, leadership – Enhancing the customer experience with recent forward-thinking improvements is at the heart of our vision to serve your needs with excellence.

With savings delivered daily, SSI develops long-term client relationships

“SSI audits complex freight billing from carriers around the world and provides meaningful business intelligence to our logistics team, which improves our productivity as we focus on what we do best.”
